

Press Release
Aalborg, Denmark
9 September, 2013

2operate doubled revenues and tripled the number of supported networks

Aalborg, Denmark, 27 August, 2013 – 2operate today announced the results of fiscal year 1 July 2012 – 30 June 2013. In short, the number of operator customers was increased from 2 to 4 and likewise, revenues were doubled to DKK 1.9 million. Moreover, the deployed installations now represent all key mobile technologies (2G, 3G, and 4G) and leading equipment vendors (Ericsson, NSN, and Huawei).

“The main focus in the past year has been scalability.” said Lars Moltsen, CEO of 2operate. “In particular, we have been quite successful in increasing the number of supported network technologies and equipment providers. This means that our solutions are now available off-the-shelf to 90% of the World's mobile network operators.”

“The company has been able to make significant progress in market penetration despite challenging market conditions.” said Kaj Juul-Pedersen, Chairman of the Board of 2operate. “The reason behind this can be found in the great level of innovation of the offered solutions - which was also recognised by Frost & Sullivan who named 2operate as the winner of their prestigious *New Product Innovation Award* for Operations Support Systems/Network Management – and we are confident that the positive trend will continue in the coming years.”

The Annual Report can be downloaded from the company's home page: www.2operate.com

About 2operate

2operate belongs to a new generation of specialized innovators in a market for network and customer management software. By exploiting advanced mathematics, latest advances in software engineering, and effective data visualization, 2operate enables mobile service providers to operate better networks at lower cost.

2operate was founded in 2009 by a team of experienced telecom executives and software experts to commercialize IPR developed under two European research projects on network automation. 2operate builds upon a strong combination of core technical skills and telecommunications business processes understanding. The company mission statement is “Simplifying Troubleshooting” and we believe this is exactly how our solutions differentiate.
